GRAND ISLAND

**SOLD TO :** STOLTENBERG, WAYNE  
**SERVICE ORDER :** SO0038559

**Segment#: 1 AGL YIELD MONITORING NOT WORKING**

Work Site : 3721 W HWY 2 GRAND ISLAND,NE 68803-1211

**Concern:**

**Complaint :**

Yield monitor not working.

**CORRECTION:**

I got in the combine with Wayne.

I went through his display to see why his yield monitoring wasn't working.

Found that the yield plus moisture sensor was turned to none instead of yield.

After moisture sensor was turned on the yield started to work.

Auto header height - I did a ground calibration and then we engaged the header.

I set his one and two set points and then we test ran.

Running through the field auto header height was working as it should .

We got to the other end and it raised

When the machine was turned around it lowered back to where it should.

When we were coming back to the truck so that I could leave.

He shut the header off and it came up with the Auto header height disabled code again.

When we engage the header everything was still working properly so he didn't want me to look at any further at this time.

**Labor :**

| Description                   | Amount   |
