**Concern:**

**CORRECTION:**

Went out to the field and checked to make sure he had all electrical hooked up. Made sure that the Pro700 was set up properly. Made sure the seed graph parameters were set up. When Wayne put the proper sprocket on the planter, it started to work properly and at the right population. When trying to plant, his steering kickout for the autosteer kept going off, and it wasn't able to steer. Calibrated the kickout and increased the threshold for the kickout. Rode a round with him and made sure it was working, then came back to the shop.  
12 miles round trip.
